

**Task Order Dated August 13, 2020
Environmental Services for the
Wingate Park Regional EWMP Project**

**Addendum #1
Issued: August 26, 2020**

The changes in this Addendum shall be included in the Task Order, and this Addendum will be part of the Task Order documents. All conditions not affected by this Addendum will remain unchanged.

Inquiries received by August 24, 2020 at 10:00 p.m.:

Question 1: The City's website indicates that this project is for "City Approved CEQA Consultant's Only." Is it possible to get a list of these approved firms?

Response 1: Please see the list below of City Approved CEQA Consultants approved by the City Council.

Consulting Firm	Address	Phone Number
Dudek, Inc	38 N. Marengo Ave., Pasadena, CA 91101	626-204-9829
ESA	80 South Lake Ave. Suite 370, Pasadena CA 91101	626-204-6170
EPD Solutions, Inc	2 Park Plaza, Suite 1120, Irvine CA 92614	949-794-1181
Michael Baker	3900 Kilroy Airport Way, Suite 120, Long Beach CA 90806	562-200-7165
MIG	537 S. Raymond Ave. Pasadena, CA 91105	626-744-9872
PSOMAS	3 Hutton Center Dr. Suite 200, Santa Ana CA 92707	714-751-7373

Question 2: Does the City want Consultants to price an IS/MND plus an option for an EIR?

Response 2: Los Angeles County Flood Control District prepared an Enhanced Watershed Management Programs (EWMP) Program EIR (PEIR - SCH# 2014081106) in 2015, to evaluate and select Best Management Practices (BMPs) including the one proposed for Wingate Park (formerly Kahler Russel Park). BMPs involve the construction of physical control measures such as pumps, pre-treatment devices, infiltration chambers, and outfalls, to improve the water quality of incoming stormwater and dry weather flows (irrigation runoff) and then treat, store, infiltrate or

release clean water for use in groundwater recharge or onsite irrigation.

As BMPs have already been evaluated for environmental impacts, the proposed environmental document to be prepared would evaluate specific site conditions at Wingate Park and determine if there are any further impacts to be considered. Consultants are asked to review the IES prepared by TetraTech (see City's website) and LA County Flood Control District's PEIR to determine if an MND or EIR is required and provide costs to prepare that document in their proposal.

Question 3: Please describe what the Water Quality/Storm and Wastewater Control Management technical study/reports entails.

Response 3: Within Section B – Scope of Services, the fourth bullet point provides examples of various technical studies and reports on subjects that may be pertinent for a thorough review and preparation of an CEQA Initial Study. Studies (geotechnical and hydrological), plans (site, drainage, typography) or reports that were included in the Preliminary Feasibility Report, prepared by TetraTech for this project, may be found on the City's website at <https://covina.ca.gov/rfps>.

Please be reminded that the deadline for proposals to be submitted, is September 3, 2020 before 10:00 a.m. to the City Clerk's office. Please address your submittals to:

Attn: Brian Lee, Community Development Director
